Output (XML)

Output (JSON)

Output (YAML)

```
1  ---
2  monthly_price: '21.34'
3  status: 1
4  yearly: 0
5  reason: Activated EXAMPLECOMPANY license on 192.0.2.0 in the 'example'
6  price: '100.00'
7  promoinfo: ''
8  licenseid: '6793969'
```

Parameters

This function accepts the following parameters:

Parameter	Type	Description	Example
ip	*string*	**Required** The IP address for which to add a license.	192.0.2.0
packageid	*string*	**Required** The package's ID number. The Manage2 [List Package Information](#) function returns a list of possible values.	008
groupid	*string*	**Required** The ID of the group to which to add the license. The Manage2 [Display Groups](#) function returns a list of possible values.	013

Parameter	Type	Description	Example
`force` or `reactivateok`	*Boolean*	Whether to forcibly add the license to the specified IP address: • `1` — Forcibly add the license. • `0` — Do not forcibly add the license. This parameter defaults to `1`.	`0`
`dryrun`	*Boolean*	Whether to display error messages and price information, but **not** activate the license: • `1` — Display fee information but do **not** activate the license. • `0` — Do not display fee information but **activate** the license. This parameter defaults to `0`.	`1`
`maxusers`	*integer*	The maximum number of users allowed on the license.	`120`
`external_notes`	*string*	A space for additional information associated with the license, up to 64 characters long.	`testlicense`

Returns

This function returns the following values:

Return	Type	Description	Example
`licenseid`	*integer*	The new license ID.	`6793969`
`monthly_price`	*numeric*	The monthly base price of a license, in US dollars.	`21.34`
`price`	*numeric*	The price for a license, in US dollars.	`100.00`
`promoinfo`	*string*	Information about any applied promotional rates. One of: • A string value. • `""` — No promotion applied.	`""`
`reason`	*string*	Information about the license activation.	`Activated EXAMPLECOMPANY license on 192.0.2.0 in the 'example' group.`
`status`	*Boolean*	Whether the function succeeded: • `1` — Success. • `0` — Failure.	`1`
`yearly`	*Boolean*	Whether the license is a yearly license: • `1` — A yearly license. • `0` — Not a yearly license.	`0`
