- **Development Environment** — VS Code, Command Line (CLI)
- **Governance & AI Tools** — Automated Style Guides, Claude, Copilot, Prompt Engineering, LLM Orchestration, AI-Assisted Drafting and Review
- **Collaboration & Management** — Jira, Confluence, Agile/Scrum

EXPERIENCE

Technical Writer [Postman, Inc.](#) – *Remote*

APRIL 2022 - PRESENT

Author and maintain documentation for the Postman Docs, covering all aspects of the frontend product and ensuring parity with the current product state. Optimize and maintain the Postman API Collection and Postman API OpenAPI specification to improve structural clarity and technical accuracy. Full responsibilities include:

- Maintain and update Postman's current public API collection and OpenAPI specification in the Postman Public Workspace.
- Review the engineering team's work for documentation review, such as string reviews, UX and error messaging, and internal documentation.
- Work with other engineering departments to review their API documentation and provide constructive feedback for improvement.
- Review and improve the team's internal documentation for clarity and consistency. Document processes and style guides for tone and consistency.
- Work closely with teams' OpenAPI specification files to improve structure and clarity for both internal and user consumption.
- Produce release notes for the release of changes or new endpoints to the Postman API and Postman product.
- Work with Postman API engineers to document the Postman MCP (Model Context Protocol) server.
- Write documentation for the Postman Docs center, which covers all aspects of the frontend product.
- Perform routine documentation maintenance to ensure parity with the current state of the product.

Technical Writer [Zoom, Inc.](#) – Remote

MAY 2021 - APRIL 2022

Create and edit developer-facing documentation for Zoom's various API offerings. Work with other writers, engineering, and developer advocates to document API improvements and enhancements for monthly releases.

- Lead the Developer Documentation department API (OpenAPI) and webhooks documentation efforts.
- Reviewing and continually improving the existing API documentation presentation and schema formatting.
- Review and approve engineering merge requests.
- Continually ensure proposed changes or additions to the API documentation are technically accurate and clear.
- Provide user-driven feedback during engineering review.
- Creating release notes and additional technical communications or documentation, including working with Product Managers and Marketing to announce changes.
- Reviewing and improving existing developer documentation (non API).
- Collaborating with the developer relations team to continually improve our existing developer documentation to ensure that it is clear to its intended audience.

Senior Technical Writer at [cPanel, L.L.C.](#) – Houston, TX

DECEMBER 2016 - MAY 2021

Produce high-quality [documentation and knowledge base articles](#) for the [cPanel & WHM](#) product.

- Work with a Scrum team to document all product features, improvements, and changes each release cycle, including:
 - Documenting features, release notes, and technical information for the product's customers.
 - Creating quick guides for cPanel technical support and training teams.
 - Reviewing code and new or modified strings for localized text.
 - Reviewing [API documentation](#) to ensure they meet cPanel's style guide standards.
 - Review developer merge requests to verify whether any changes require documentation review.
 - Work closely with the developers and quality assurance analysts to ensure proposed documentation is technically accurate before documentation peer review.
 - Provide user-driven feedback during development discussion and feature planning.
- Work with the technical support team to maintain and update any incorrect or outdated published documentation.
- Review and revise existing documentation to ensure they meet cPanel's style guide standards.
- Collaborate and facilitate the review of the cPanel style guide on a regular basis.
- Peer review other writers' work to ensure it meets cPanel's style guide standards.
- Create tutorial video content.

Pipe & Tube QA Document Coordinator at DistributionNOW – Houston

2010 - DECEMBER 2016

Managed and maintained certified mill test report data in the company's quality assurance document database.

- Assisted internal customers with the receipt of documentation.
- Investigated and resolved all issues with missing documentation.
- Supported department sourcing specialists teams.
- Managed and maintained all department manifest documentation, records, and files for materials on all inbound vessels.
- Assisted the logistics team with day-to-day operations, including coordination between internal customers and freight forwarders.

ACCOMPLISHMENTS

- Provided a complete overhaul of the Postman API documentation, previously maintained by developers. Converted the Postman API Collection into a comprehensive, well-maintained suite of API offerings that are easy to navigate and provide comprehensive information and data.
- Converted the complete Postman API OpenAPI documentation into multi-file format, managed in its own Git repository with Claude skill implementation. The repo contains multiple files, organized by their feature and the type of component.
- Participated in the migration of Zoom's previous SaaS documentation solution to in-house [Gatsby](#)-based documentation.
- Participated in the migration of cPanel's [Confluence](#)-based documentation to [Hugo](#)-based documentation. This project included converting, formatting, and refactoring document presentation for all of our published documents.
- Highly-involved in the conversion project of cPanel's Confluence-based API documentation to [OpenAPI](#)-style documentation. Work in this project involved:
 - Converting existing documentation to the OpenAPI format and ensuring that the information was accurate and properly migrated to the new format.
 - Peer reviewing others' pull requests in the project.
 - Working as a project Subject Matter Expert (SME) to provide help and guidance to others.
 - Participating in discussions about the cPanel style guide for OpenAPI document formatting.
 - Reviewing and merging finalized files to the project repository.
- Managed converting cPanel's [Manage2](#) developer and API documentation to Hugo. This solo project involved creating a directory framework to house the documents in and also revising the existing documentation format.

EDUCATION & TRAINING

Technical Writing Certification

Bellevue College, 2016

Bachelor of Arts, Criminal Justice

Sam Houston State University, 2008
